

CRAFTS' REXALL NEWS

VOLUME I. Number 2.

MARION, OHIO, SATURDAY, JUNE 25, 1910.

WEATHER SUNDAY--FAIR AND WARMER.

THE CONTINUED WEATHER BRINGS IT'S DEADLY PERIL TO THE USERS OF MILK AND CREAM AND THE VARIOUS FOODS AND DELICACIES MADE THEREFROM

Therefore, Crafts' think that their customers have a lively interest in the way they handle the ice cream making end of their fountain business. It is a well known fact that milk is one of the most fertile mediums for the growth of various bacteria, and the warmer the weather the more rapid do bacteria increase. There also must be considered the conditions and environment of the production of milk. Careless and filthy conditions in the dairy will prove as fatal to children and babies as the handling by the dealer.

With due regard to the above utmost care has been used in selecting our supply of cream. We do know that it is produced from healthy cows, that sanitary conditions prevail in every detail of its handling before it reaches us. Once in our little plant it's placed in sterilized receptacles and kept packed in ice constantly until it is placed on sale in the form of our deservedly popular ice cream. The fact that unusual precautions are taken at every opportunity and that we pay in the neighborhood of 35 per cent more for our cream than ordinary cream can be bought for is reason a plenty why people, once they have our ice cream, will have no other.

The one great trouble with remedies of this class has been that the relief afforded was but temporary, the stomach and intestines being so weakened that after the first effects had worn off constipation more severe than ever would set in. Again and again the patient would be required to resort to physic while with each occurrence the dose would have to be increased. In the end Nature would lose all control and chronic constipation would result. Your money cheerfully refunded if not satisfactory. Price 25c.

REXALL MUCU TONE FOR CATARRH.

Rexall Mucutone is a scientifically prepared combination of those all teratives and general tonics that have been long esteemed by members of the medical profession as being so beneficial in general catarrhal conditions. It contains no harmful or habit producing drugs. A stimulant to the appetite, a blood builder, 50c and \$1.00.

Sherberts are practically the same as ice cream except that water is used in the place of cream. Many people prefer them on hot days because, containing no cream, they make less heat in the body.

At this season of the year we use fresh fruit and prepare them each day with just sugar and water. No artificial color or no preservative is used. These are our flavors.

The above are some of the points about the unseen part of our fountain business. At the fountain every thing is so open that customers can readily see for themselves the cleanliness and attractiveness of everything. We serve a host of hot drinks and dishes and they cost no more than elsewhere, for we use our fountain as a means to attract customers for our drug and other business.

As Dr. Wiley has remarked imitation ice cream can be made from milk plenty of a gum for thickener and a little unthinking will be readily fooled into thinking they are getting a bargain. However about all most people need is a taste of real cream ice cream.

The same idea of substitution is often used in making fruit ice creams. Some fruit flavor, plenty of bright color and a cheap so-called ice cream is produced.

Real fruit ice cream is expensive, especially this year, for a rich fruit ice cream such as we make is nearly one-half solid fruit with no added artificial color.

The best of cream can be quickly rendered unfit for use if the dishes and packers used are not absolutely clean. Mr. F. J. Crafts who has personal charge of this department is especially qualified to recognize and combat the many dangers of ice cream manufacture having devoted three years to the science of bacteriology and sanitation along with his education as chemist and pharmacist. Therefore this store knows why it is best to use exceeding care and we realize at the same time that the unimpeachable reputation of quality and cleanliness is our best advertisement.

PORK BILLS NOT SIGNED

By the President and Members are Apprehensive Fear of a Veto.

By United Press Wire. Washington, June 25.—With adjournment staring them in the face, there was a very evident if not expressed uneasiness among members of congress today over the fact that President Taft had not signed either of the two "pork bills," the rivers and harbors bill appropriating over \$1,000,000 and the house buildings bill appropriating \$22,000,000.

The rivers and harbors bill was passed by the senate ten days ago. Unless the president takes action today the bill by the time limit becomes a law. During the ten days that the president has had this mes-

ure under consideration, it has become known at the capitol that Taft is displeased with several of its provisions notably the lakes to gulf appropriation; a project to deepen a harbor in Rhode Island; the improvements for Mobile bay and the deep waterways scheme for South Carolina.

Last fall president Taft did much talking against congressional "pork barrels" and when he hesitated upon this bill, which is charged appropriate money in direct contravention to the recommendations of the army engineers, there was great apprehension that he might veto it.

CHOCTAW AND CHICASAW

By United Press Wire. Washington, June 25.—An investigation of the affairs of the Choctaw and Chickasaw Indians that promises to include sensational bribery charges made by Senator Gore was decided on by the senate today.

Some time ago Senator Gore introduced a resolution providing that the committee on Indian affairs, or a sub-committee thereof, should investigate the question whether the Choctaw and Chickasaw needed legal services for the sale of their coal and timber lands; to inquire into any contracts that had been made, and whether the commission of ten per cent, provided by any such contract, is reasonable.

Such investigation will be made at the next session. Senator Kean, of the committee on contingent expenses, made a favorable report on the resolution to the senate today. A request for an immediate investigation was granted and the resolution was adopted without discussion.
